Connection

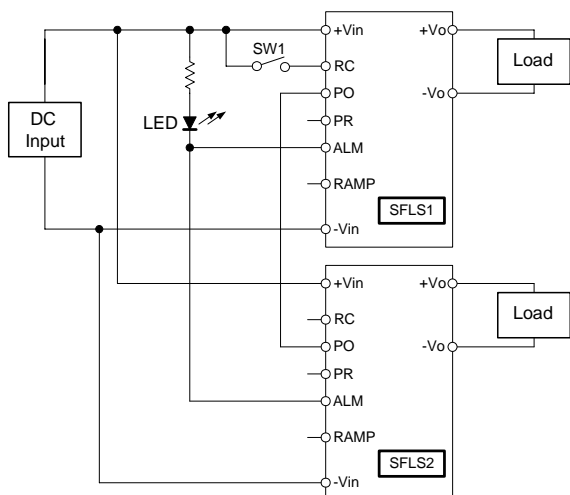

Connection for Standard Use

Connection for standard use

- Normal or abnormal operation of the unit can be monitored by using the ALM pin.
- When remote ON / OFF function is not use, please open-circuit between RC and +Vin or short-circuit between RC and -Vin.

Parallel operation (Start in / out)

Examples of series operation

- By connecting PO pin, difference of start-up voltage and stop voltage can be prevented.

Sequence control and Delay time control

C_{po}: Delay time control capacitor

Example of parallel operation

- By connecting short-circuit between PR and PO pin, start-up time can be controlled.

Ramp-rate control

- By connecting external capacitor C_{RAMP} between RAMP and -Vin pin, ramp-rate can be controlled.
