MWLT150 & WLT150
Medical & Commercial
Open Frame Power
Supplies in 2 x 4 Inch
Footprint**

Camarillo, California, May21st, 2009— Red Rocket, Inc, the leading seller of ultra miniature, high efficiency power supplies, announced that it has released its new MWLT150 & WLT150 Series of Open Frame AC/DC power supplies for use in the Global Medical and Commercial Industries. The (M)WLT150 Series of single output products are one of the smallest and most efficient 150-watt power supply packages available in the industry today.

The (M)WLT150 Series features Universal AC inputs from 90v to 264v, measures a mere 2 inches x 4 inches x 1.3 inches, and has a rated efficiency of greater than 86%. It is configured in all popular single output voltages and its flexible design allows for simple modification to alternate voltages as required. Additionally, the (M)WLT150 Series comes with a standard 12v auxiliary output and can be ordered in Class 1 or Class 2 configurations. The units are produced in Red Rocket's India manufacturing facility which has received numerous Quality and manufacturing awards from noted bodies such as Dun & Bradstreet, Elcina & Frost & Sullivan.

“The pent up demand we are seeing for this product is staggering,” said David Carley, VP of Red Rocket. “The (M)WLT150 Series is a strong addition to the EOS brand of high density, high efficiency power supplies required by our customers in the various medical & commercial market segments. Our existing and new customers can now have a power progression from 40 to 150 watts in the same footprint which saves the customer costs in time to market and re-tooling of existing mechanicals,” he said.

The (M)WLT150 Series are available to order today and samples are available free of charge via our design-in supporting sales channels. The (M)WLT150 series is a further evolution of the. The EOS brand of high end internal power supplies and external adapters are available through a network of manufacturing sales representatives and distributors worldwide.
