At Multi-Tech Systems, we understand the importance of customer relationships and providing our customers with long-term modem solutions. We have a 33-year history of supporting customer programs and we're committed to our SocketModem customers for the long-term, to do everything possible to address Component End-of-Life issues that are mutually beneficial.

In response to Conexant's discontinuation notice of several modem chip-sets, Multi-Tech has released replacement SocketModem part numbers using their latest generation modem technology. We have designed in backward compatibility and enhanced the product with new features and even greater reliability. The following table shows the new part numbers and any known variance from the old part number that could affect your application.
