

## **Jupiter 12 GPS and IVN Sensor Last Time Buy Notice**

18 May 2005

### **Jupiter 12 and IVN Sensor Products**

It is with regret that Navman must announce the end of life for the Jupiter 12 GPS product line and the IVN Sensor. The fabrication plant, used by Navman's supplier for the single source RF and Base-Band ASICS, is closing with little notice. There is no other supply for these specific devices.

Navman has ordered sufficient inventory to meet projected demand through the end of this year with limited additional supply for early 2006. Since the supply is limited, and Navman have other customers who will shortly have their opportunity to make a last time buy, Navman will need your last time buy purchase order to insure availability to meet your needs. In consequence Navman must ask that you submit your last time buy order no later than close of business, Wednesday, 6 July 2005.

Since there is no flexibility to build additional product, Navman will process your orders and make every effort to fulfill them as promised. There can be no guarantees should supply run short.

### **Jupiter 21, replacement for Jupiter 12:**

Navman has designed a replacement module, Jupiter 21 that will offer most customers the same form, fit, and function as the current Jupiter 12 when used in the NMEA mode. Since J21 will be based on the SiRFstar IIe/lp chipset, compatibility with J12 will not be 100%. Navman will provide specifications at the end of the month and samples in the June/July time frame. Full production is scheduled for August.

### **IVN Sensor:**

There is no immediate form, fit, and function replacement for the IVN Sensor. Consider the GPS1240 sensor designed for a broad range of applications including extreme environments. Also note Navman has released the Jupiter 110 Sensor module with integrated GPS antenna. The J110 is an OEM board and not a plug and play device like the IVN Sensor or GPS1240.

### **Distributor Final Return Date – 6 July 2005**

This is the last day for distributors to return inventory. New inventory purchased for delivery after 6 July 2005 is non-cancelable and non-returnable.

### **Last Order Date – 6 July 2005**

Please assess your product needs and place a last time buy order no later than 6 July 2005. All new orders for the above mentioned products are non-cancelable and non-returnable.

### **Final Ship Date – 31 March 2006**

This is the final ship date. Orders placed in compliance with the above dates must be scheduled for shipment prior to 31 March 2006.

### End of Life Product Part Numbers

Description	Mfg P/N
Jupiter 12 GPS receiver module with RA OSX	TU35-D410-021
Jupiter 12 GPS receiver module with Straight OSX	TU35-D410-031
