SIP 8

Aimtec introduces the AM1GU-JZ series of DC/DC converters, is part of Aimtec's first 8:1 ultra-wide input voltage range product. The impressive 4.5-36VDC input voltage can help power applications with widely varying inputs. These converters can also help reduce the total BOM by replacing multiple DC/DC converters with different narrower input voltage ranges with one cost-effective isolated DC-DC solution.

With 5, 12, 15, ± 5, ± 12, ± 15VDC output voltage options, the AM1DU is well suited for industrial and commercial applications. These products have an impressive operating temperature range of -40℃ to 105℃ with full power up to 75℃. They also feature isolation of 3000VDC and a high MTBF of 1,000,000h for improved reliability and system safety. Features such as output short circuit protection (OSCP), output over-current protection (OCP), and input under-voltage protection (UVLO) come standard with this family of products.

The AM1GU-JZ series is ideal for Battery operated circuits, IoT, analog circuits, grid power, LED, instrumentation, industrial controls, communication, and civil applications.
